

WFP Income Fund Announces a 7.19% Net Annualized Return through June 30, 2018

July 6, 2018, Newport Beach, California - The WFP Income Fund, managed by Wilshire Finance Partners, paid investors a 7.19% net annualized non-compounded return through June 30, 2018. The monthly net non-compounded return for June 2018 on a standalone basis was 0.59%. The net annualized compounded return for the fund since its inception on September 23, 2013 through June 30, 2018 was 8.80%.

The WFP Income Fund is a short term, fixed income alternative investment that seeks to protect the investor's principal while also providing attractive risk-adjusted returns primarily through investments in loans secured by first trust deeds and mortgages within the United States.

The return obtained by the fund was on an unlevered basis and was primarily the result of interest income received on the first trust deeds and mortgages in the fund's portfolio.

Performance by the Numbers

As of June 30, 2018:

Net Annualized Non-Compounded Return:	7.19%
Monthly Return (stand-alone basis):	0.59%
Net Annualized Compounded Return (since inception):	8.80%
Weighted Average Loan-to-Value:	58.06%
Weighted Average Maturity:	23 months
Average Loan Size:	\$1,732,531
Non-Performing Loans:	0
Repayment Percentage (year-to-date):	38.89%
Liquidity / Cash Position:	7.92%

At month end, the fund's portfolio consisted of loans secured in first lien position against residential, office, retail, light industrial, warehouse and senior assisted living properties, predominantly in the State of California. Other states represented in the fund's loan portfolio at month end included Colorado, Florida, Nevada, Oregon, Texas and Washington.

As of June 30, 2018, management identified one loan it has classified as substandard. A substandard loan is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Loans that are also classified as substandard must have a well-defined weakness, or weaknesses, that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the lender will sustain some loss if the deficiencies are not corrected.

Through June 30, 2018, year-to-date repayments represented approximately 38.89% of total loans. As a result, at month end the fund held a cash position of approximately 7.92%, which was up from approximately 5.61%, as of May 31, 2018.

Since the fund's inception in September 2013 through June 30, 2018, the net asset value (NAV) of the WFP Income Fund remained stable and demonstrated no correlation to the stock markets or bond markets. Further, the NAV was not sensitive to changes in interest rates.

“The fund’s returns and NAV have been consistent through the first two quarters of 2018,” said Don Pelgrim, CEO of Wilshire Finance Partners. “Due to loan repayments in June, the fund’s liquidity at June 30, 2018 was higher than the prior month. However, because the loans repaid late in the month there was little to no impact on the funds returns due to those repayments. We also experienced an increase in originations in June which should translate into new loans for the fund in July. Keeping with our desire to diversify the fund geographically, the majority of the new loan originations are related to properties located outside the State of California. Overall, we feel good about the fund’s performance to date and believe there will be a positive impact on the fund’s returns as new earning assets are added to the portfolio.”
