

WFP Income Fund Announces a 7.27% Net Annualized Return through August 31, 2016

September 6, 2016, Los Angeles, California - The WFP Income Fund, managed by Wilshire Finance Partners, paid investors a 7.27% net annualized non-compounded return through August 31, 2016. On a stand-alone basis for the month of August 2016, the fund delivered a 0.54% net return which is the equivalent of a 6.32% net annualized non-compounded return. The net annualized compounded return for the fund since its inception on September 23, 2013 through August 31, 2016 was 8.64%.

The WFP Income Fund is a short term alternative fixed income investment that seeks to protect the investor's principal while also providing attractive risk-adjusted returns primarily through investments in loans secured by first trust deeds and mortgages within the United States.

The return obtained by the fund was on an unlevered basis and was primarily the result of interest income received on the first trust deeds and mortgages in the fund's portfolio.

As of August 31, 2016, the portfolio had a weighted average loan-to-value of approximately 59.88% and a weighted average maturity of approximately 24 months. The fund had an average loan size of approximately \$973,974, consisting of loans secured by residential, office, retail, light industrial and warehouse properties located predominantly in the State of California.

Through August 31, 2016 management identified one loan it has classified as substandard. A substandard loan is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Loans that are also classified as substandard must have a well-defined weakness, or weaknesses, that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the lender will sustain some loss if the deficiencies are not corrected.

Year-to-date 2016 the fund experienced approximately \$14.8 million in loan repayments. Those repayments have created excess liquidity for the fund and resulted in a cash drag (or under-deployment) which has impacted the fund's returns.

Since the fund's inception in September 2013 through August 31, 2016, the net asset value (NAV) of the WFP Income Fund remained stable and demonstrated no correlation to the stock markets or bond markets. Further, the NAV was not sensitive to changes in interest rates.

"On a stand-alone basis, the fund delivered a 6.32% net annualized non-compounded return in July," said Don Pelgrim, CEO of Wilshire Finance Partners. "We experienced a drag on yields in August due to under deployment which was primarily caused by loan closings that may push into later months and an increase in loan declines due to requests not meeting our underwriting criteria. Wilshire will continue to seek new

loan opportunities that will generate strong risk adjusted returns for our investors, however, we will also continue to maintain our core philosophy of striving to protect their invested principal.”

The WFP Income Fund has been approved for both retirement and non-retirement accounts on the following alternative investment platforms:

- Fidelity Investments (National Financial Services or NFS); CUSIP Number 94699K534
- TD Ameritrade as WFP INCOME FUND LLC NSA; CUSIP Number 93099B102
