

WFP Opportunity Fund Announces a 10.67% Net Annualized Return through 1st Quarter 2016

April 1, 2016, Los Angeles, California – The WFP Opportunity Fund, managed by Wilshire Finance Partners, generated a 10.67% net annualized non-compounded return through the first quarter of 2016. Further, the fund delivered a 10.76% net annualized non-compounded year-to-date return through the same period.

The WFP Opportunity Fund seeks to provide attractive risk-adjusted returns to its investors through debt and equity investments in real estate within the United States. Such investments will include, without limitation, direct and indirect equity investments, joint ventures, deeds of trust and mortgages, participating loans and other real estate related investments.

At quarter end, the fund’s portfolio consisted of B Notes and second trust deeds with combined loan-to-values below 80%. All of the fund’s portfolio investments involved property inside the State of California.

“As margins continued to compress and new capital with much higher loan-to-values continued to enter the fix and flip market, the last existing participating loan in the fund paid off during the first quarter of 2016,” said Don Pelgrim, CEO of Wilshire Finance Partners. “Although we will continue to consider participating loan transactions secured by single family homes meeting the ‘spread’ or return requirements of the fund, we are actively seeking opportunities to invest in B Notes and loans secured by other asset classes, including, repositioning loans secured by commercial real estate and other income property, which we believe will generate higher returns without commensurately higher risk.”
