

WFP Opportunity Fund Announces a 10.51% Net Annualized Return through Second Quarter 2017

July 6, 2017, Los Angeles, California – The WFP Opportunity Fund, managed by Wilshire Finance Partners, generated a 10.51% net annualized non-compounded return through the second quarter of 2017. The quarterly net non-compounded return for the second quarter of 2017 on a standalone basis was 0.80% annualized. The net annualized compounded return for the fund since its inception on September 23, 2013 through June 30, 2017 was 13.47%.

The WFP Opportunity Fund seeks to provide attractive risk-adjusted returns to its investors through debt and equity investments in real estate within the United States. Such investments will include, without limitation, direct and indirect equity investments, joint ventures, deeds of trust and mortgages, participating loans and other real estate related investments. The fund is not correlated to the stock or bond markets and has little to no sensitivity to interest rates.

The return obtained by the fund was on an unlevered basis and was primarily the result of interest income received on the trust deeds and mortgages in the fund's portfolio. At the end of the second quarter in 2017, the fund's non-cash assets consisted of first mortgages, second trust deeds and B Notes with a weighted average combined loan-to-value of approximately 67.96%.

The cash position in the fund dramatically increased in the second quarter of 2017 as a result of capital being returned through loan repayments and the previous realization of gains on other investments in the first quarter of the year. Management maintained a very high cash position throughout the second quarter as it continued to assess investment opportunities meeting the fund's investment parameters, risk tolerance and return requirements. However, holding a very large cash position caused the fund to experience a significant drop in its returns during the second quarter.

“On a stand-alone basis, the return in the second quarter of 2017 was extremely low and did not come close to our stated target,” said Don Pelgrim, CEO of Wilshire Finance Partners. “The decline in earnings in the fund was primarily a result of large amounts of cash returning to the fund from loan payoffs and investment gains realized in the first quarter of the year. These types of swings will occur in this fund due to the mismatch in timing arising from the return of cash from prior investments and the redeployment of that cash into new investments meeting the fund's investment criteria. While we continue to seek new investment opportunities for the fund, those investments must meet the fund's shorter investment horizon, risk tolerance and return expectations. As a result, we will continue to remain selective about the investments we believe will generate a good risk-adjusted return for the fund's portfolio.”
